

Live SVMIC Webinar

SELF-AUDIT EVALUATIONS & MANAGEMENT CODING DOCUMENTATION

Description

Performing internal audits is crucial when it comes to successfully passing a payor audit. In 2021/2023, the American Medical Association in conjunction with the Centers for Medicare and Medicaid Services and the payor community revised documentation guidelines to reduce administrative burden and better align with how patient care is being delivered today. Since that time, payors have increased their auditing efforts to ensure guidelines are applied according to the revised Medical Decision-Making Table.

Whether you are new to the concept of internal audits or looking to enhance your existing processes, this webinar will equip your team with the building blocks to conduct your own self-assessment and will provide valuable insights and practical strategies to assure physician/providers' documentation demonstrates: medical necessity, "Proof of thought" and medically appropriate history, exam, and medical decision making.

Details

Who should attend: Medical professionals, practice executives, coders, and billers for best practice guidance to perform internal chart audits

When: Thursday, July 17, 2025, at 12:00pm to 1:15pm
