# one**Chart**

# Changes to MethodistMD Website

## Audience: Physicians and Related Roles

Changes to MethodistMD.org were a necessary step to move our Citrix environment off end-of-life Windows 2008 servers.

⚠️ **If you are on a UTHSC computer on the UTHSC network, go directly to https://mlh.gomolli.org/**
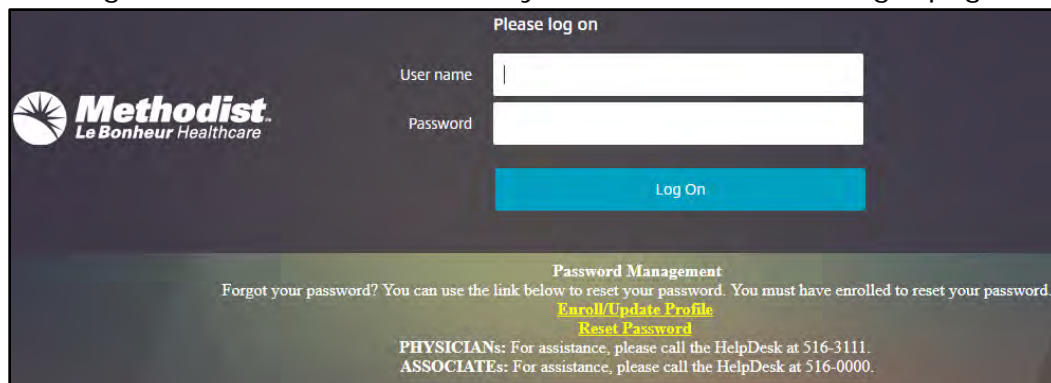

## Overview of Website Updates

1. Under the **Apps** heading, the **OneChart - includes Cerner** link provides access to PowerChart, Cerner and other role-based applications. The **MyApps** link provides access to clinical applications, knowledge links and non-clinical applications.
   **If you previously accessed myApps, using a bookmark, the bookmark will no longer work. You must access via www.methodistmd.org.**

2. Clicking the **oneChart** link directs you first to the Citrix Login page.

   a. **For Windows Users:**
      You must be running **Citrix Receiver 4.7 up to Receiver 4.9** (Windows 4.10 has

not been validated by Cerner). You can download this version from www.methodistmd.org.
    **b. For Mac Users:**

- You must be running **Citrix Receiver version 12.1.1 up to 12.9.1**.
- Citrix Workspace for Mac 19.10.x is currently in the validation phase with Cerner.
- macOS Catalina has not been validated and currently does not work with Citrix/Cerner.

3. Once logged in to Citrix, choose an authentication method.

4. After successful login, your list of Cerner applications will render.
   **NOTE:** The list of icons are based on your role/access and may vary from the icons listed below.

5. Access to Clinical Apps is still available via the **Categories** option at the top of the screen.

An example of the clinical applications available from the Clinical App Web Links folder.

6. Clicking the **MyApps** link from the home page renders clinical links.

7. Access to oneChart is also available from the Clinical applications list.

Please note some applications require using Internet Explorer only.
